

Document owner: Joseph O'Sullivan, Managing Director

Version: 1.0

Effective date: 26 August 2026

Next review date: 26 August 2027

Approval status: Approved

Simtec Consult Limited is committed to protecting the health, safety and welfare of employees, workers, contractors, customers, visitors and others who may be affected by our activities. We will manage risks proportionately and comply with the Health and Safety at Work etc. Act 1974 and other applicable requirements.

1. STATEMENT OF INTENT

Simtec will provide and maintain, so far as reasonably practicable, safe working arrangements, suitable equipment, appropriate information and instruction, consultation, welfare arrangements and competent support. Health and safety is considered alongside service quality, security and commercial decisions.

2. RESPONSIBILITIES

2.1 Overall responsibility

Joseph O'Sullivan, Managing Director, has overall and final responsibility for health and safety, approves this policy and ensures that appropriate resources and arrangements are available. Joseph O'Sullivan is also the responsible person for deciding and making reports under the Reporting of Injuries, Diseases and Dangerous Occurrences Regulations 2013 (RIDDOR).

2.2 Day-to-day co-ordination

Marc Rayner, Head of Operations, is the day-to-day Health and Safety Lead. He co-ordinates risk assessments, advises on controls, follows up actions and supports implementation and review. Contact: 07810 897639 / marc.rayner@kevinward.co.uk.

2.3 Workers

All workers must take reasonable care of themselves and others, co-operate with Simtec, follow instructions and customer-site rules, use equipment correctly, report hazards and incidents promptly and avoid intentionally misusing safety equipment or controls.

3. RISK ASSESSMENT AND CONSULTATION

Simtec will maintain proportionate risk assessments covering its actual activities and review the risk-assessment register at least every six months, after a significant change or incident, and when there is reason to believe an assessment is no longer valid. Findings and actions will be communicated to affected workers. Workers may raise concerns or suggestions directly with the Managing Director or Health and Safety Lead.

4. HOME WORKING AND DISPLAY SCREEN EQUIPMENT

Simtec operates predominantly through home working and approved remote locations. Regular display screen equipment users must complete a DSE and home-working assessment, maintain a suitable workstation, take appropriate breaks and report discomfort, equipment defects or changes in circumstances. Simtec will review concerns and provide reasonable equipment, guidance or adjustments where appropriate.

5. OCCUPATIONAL HEALTH, STRESS AND FATIGUE

Occupational health, mental health and work-related stress are managed under the Stress and Mental Wellbeing at Work Policy. Fatigue, workload, working hours, isolation, travel and individual health needs will be considered in risk assessment and work planning. Reasonable adjustments and qualified external advice will be obtained where appropriate.

6. BUSINESS TRAVEL AND DRIVING

Travel must be planned to minimise fatigue and unnecessary risk. Drivers must be licensed, insured for business use where required, fit to drive and use a roadworthy vehicle. Mobile phones must not be used hand-held while driving. Workers must stop, rest, delay or rearrange travel if tired, unwell, affected by medication or unsafe conditions. Rail or overnight accommodation should be considered where it reduces risk.

7. CLIENT PREMISES AND CONSTRUCTION SITES

Simtec does not normally carry out construction work, make construction deliveries, install physical equipment or interface with construction operations. Attendance at client premises is generally limited to meetings, discovery, training, consultation or software support. Workers must follow visitor arrangements, inductions, access restrictions, emergency procedures and reasonable PPE requirements. Any proposed activity beyond normal visitor or office-based work must be assessed and approved in advance.

8. EQUIPMENT, ELECTRICAL SAFETY AND WELFARE

Work equipment must be suitable, maintained and used as instructed. Defective equipment must be taken out of use and reported. Workers must visually check leads, chargers and equipment and must not undertake electrical repairs unless competent and authorised. Home workers must maintain reasonable lighting, ventilation, temperature, space and welfare arrangements and report material concerns.

9. FIRST AID, EMERGENCIES AND LONE WORKING

Home workers should use normal household emergency services and maintain access to basic first-aid supplies. At customer premises, the host's emergency and first-aid arrangements apply. Remote workers must maintain agreed communication and contact arrangements. Additional lone-working controls will be considered where work location, timing or personal circumstances create increased risk.

10. INCIDENTS, NEAR MISSES AND RIDDOR

All work-related accidents, injuries, ill-health concerns, dangerous occurrences and near misses must be reported promptly to the Managing Director and Health and Safety Lead and recorded. Immediate medical or emergency needs take priority. Simtec will investigate proportionately, preserve relevant information, implement corrective actions and determine whether a RIDDOR or other notification is required.

11. CONTRACTORS AND SUPPLIERS

Contractors and suppliers must be competent for the work they perform and must co-operate with Simtec's health and safety arrangements. Appointment and monitoring will be proportionate to risk. Where a contractor controls its own work, Simtec will confirm responsibilities, relevant information, interfaces and reporting routes.

12. INFORMATION, TRAINING AND MONITORING

Health and safety information will be provided at induction and when risks or arrangements change. Additional training or competent advice will be provided where required. The Managing Director and Health and Safety Lead will review incidents, assessments, actions, worker feedback and changes to work at least annually.

13. APPROVAL
