

Simtec Consult - Malware Protection Policy

Version: 1.1

Status: Approved

Owner: Director

Applies to: All staff

Related to: Cyber Essentials

Last reviewed: 2026-06-22

Next review due: 2026-09-22

Purpose

Company devices must be protected against malware using suitable built-in protection, anti-malware software, or trusted application sources.

Policy

Windows devices must use Microsoft Defender Antivirus. macOS devices must keep Apple's built-in malware protections enabled. Android and iOS devices must use vendor security protections and app store controls.

Linux devices must install software only from trusted signed package repositories or official vendor sources. Unsigned or untrusted applications must not be used for company work.

Mobile apps used for company work must be installed only from the Apple App Store or Google Play Store.

Supported browsers must keep malicious-site protection enabled, such as Google Safe Browsing, Microsoft Defender SmartScreen, Safari fraudulent website warnings, or equivalent controls.

Malware protection must stay updated and block or quarantine malware when detected.

Review

Malware protection is reviewed at least annually and when devices or operating systems change.
